

YES! PLEASE require broadcasters to record all programming and retain the recordings. When I was News Director of KRLD, Dallas, General Manager Jerry Bobo made it his policy that programs were not recorded (even though they were) so he could claim, if sued, that no recordings existed. Hypocrisy! Such attitudes are undoubtedly rampant in this business today and accounts for the sleaze that's being routinely pumped into America's homes, contributing to the downhill slide and decay of our culture. Hold us accountable! Please! As Chairman Powell said at this year's RTNDA/NAB meeting -- broadcasters KNOW where the lines are and they CHOOSE to cross them, believing they can claim to be shocked by garbage and yet still air it and get away with it. We are all the poorer for it. Many do not care about the responsibility that comes with a license to use the public airwaves. Like Bobo and Mel Karmazin, they only care about lining their pockets.
